Introduction

Stronger, lighter, faster... better

The Volkswagen Touareg is lighter, roomier, more powerful and more efficient than ever before. A single glance is all you need to take in the changes: the stance is lower, the lines more purposeful, the look more streamlined. Yet not a single sacrifice has been made in the course of all these improvements; in fact, we think it offers the perfect combination of performance, style and all-round versatility.

The Touareg range comprises four models, ensuring that no matter what your driving needs, there's a car for you. The 150TDI is economical with fuel and generous with power. The V6 TDI combines diesel power with mountains of torque and the V6 TDI 4XMOTION® has the perfect combination of interior comfort and secure off-road performance. While the V8 TDI R-Line delivers exceptional performance, styling and standard equipment.

Quality touches abound. The interior is spacious, comfortable and above all, highly functional, combining advanced safety features with multimedia capabilities and ergonomic controls. From the Start/Stop* system to the unique ignition key, the Touareg is a car that's been designed with only one thing in mind – providing a driving experience like no other.

It's also a technically sophisticated car, with active and passive safety systems, advanced driver assistance systems and BlueMotion* Technology to reduce emissions and fuel consumption. It's safe, economical and truly an all-purpose car for all seasons.

*Not available on V8 TDI R-Line.

Range Overview

150TDI – Powerful, economical and enjoyable

The 150TDI is powered by a turbocharged, common-rail diesel engine. With huge amounts of torque on tap it'll get you to your destination in style and comfort while just sipping on its fuel.

V6 TDI – Powerhouse all-rounder

The V6 TDI's diesel engine is nothing short of astonishing. Even when fully laden it pulls away effortlessly, cruises all day and remains unfazed when the going gets rough. It's a versatile luxury vehicle for those who require serious power every day.

V6 TDI 4XMOTION®* – The ultimate escape vehicle

Combining Volkswagen's V6 TDI engine with its 4XMOTION® transmission has produced a vehicle that can truly handle any conditions thrown at it. With phenomenal off-road performance, even the most hard-to-reach locations are now within range.

* Optional Off Road Styling Package Shown

V8 TDI R-Line – The performance, style and refinement that you demand

The new Touareg V8 TDI R line is styled and powered with performance in mind. It's also a truly versatile, everyday car that is perfectly suited to those who require serious performance.

150TDI

Designed to be driven

01 & 02

Volkswagen has re-thought the SUV. The Touareg 150TDI is a car that is equally at home driving to the local shops or heading for the great outdoors. Powered by a frugal but potent turbocharged common rail diesel engine (producing 150kW of power and 400Nm of torque), paired with an 8 speed automatic transmission and 4MOTION® full time all-wheel drive, the 150TDI also includes as standard a raft of technologies including ABS, ESP, Brake Assist and more. All of which combine to make it a car that is a sheer pleasure to drive. It also comes with enough extras – Bi-Xenon headlights with LED daytime driving lights, 18inch Karakum alloy wheels, fog lights, Rear View Camera (RVC Plus), parking distance sensors, chrome body highlights and more – to make it one of the best equipped ‘standard’ models you’ll find.

Inside, it’s as safe as it is comfortable. With 9 airbags, safety-optimised front head restraints and a host of active and passive safety systems, you’re as protected as can be. Off road functions including ABSplus, hill descent assistance, traction control and an adapted transmission shift program make it a genuine all-rounder.

But there are no compromises when it comes to comfort and amenity, with leather appointed seats, chrome highlights, a colour multi function display and touch screen audio system ensuring you’ll travel in comfort. Dual-zone air conditioning, a generous cargo capacity, Bluetooth® phone connectivity and a Media Device Interface (MDI) ensure that no matter where you go, you’ll be able to bring along everything you need.

No matter whether you look at it as a family car, a country car, a long-distance car or an off-road car, the 150TDI remains one thing above all else – a driver’s car.

V6 TDI

Leading the way

It always pays to lead, not follow. Take, for instance, the Touareg V6 TDI. Its mighty 3.0 litre common rail turbocharged diesel engine outputs 180kW of power and 550Nm of torque. Mated to our smooth-shifting 8 speed automatic transmission and our 4MOTION® full-time all wheel drive system, it'll take you wherever you want to go, on road or off.

Not every vehicle can blend comfort and performance the way the V6 TDI does. Its stylish Nappa, leather-appointed interior features chrome highlights and creature comforts including dual-zone air conditioning and the RNS850 satellite navigation system (with touch-screen controls and a hard drive for media storage). Its front seats have 14-way electric adjustment and electro-pneumatically adjustable side bolsters. The dashboard, centre console and doors feature Vavona ornamental wood decorative inserts.

The V6 TDI is also equipped with 20inch Pikes Peak alloy wheels, Bi-Xenon headlights with LED daytime driving lights, fog lights and Rear View Camera (RVC Plus) as standard. Safety is also a priority for the V6 TDI. A mix of active and passive safety systems, including 9 airbags, safety optimised front seat head restraints and carefully-engineered crumple zones protect occupants if an incident occurs. Helping to prevent incidents are a range of driver assistance technologies

including ABS, ESP, Brake Assist, Electronic Differential Lock (EDL) and Anti Slip Regulation (ASR). If off-road driving figures in your regular routine you can take further comfort in its specialised off road functions. These include ABSplus, hill descent assistance, traction control and an adapted transmission shift program.

These elements all combine to make the V6 TDI the leader of the pack whether you need a comfortable cruiser, a capable off-roader or a long-distance hauler.

V6 TDI 4XMOTION®

The ultimate escape vehicle

This really is a car with 'the works'. The Touareg V6 TDI 4XMOTION® outputs 180kW of power and 550Nm of torque with our electronically controlled permanent four-wheel drive system. You want off-road capability? You got it.

Distributing torque between front and rear axles (or, if necessary, to individual wheels), the system provides the best possible traction in all conditions. The selectable off-road function also improves handling on hill descents and loose surfaces, and provides adapted traction control and transmission shift profiles.

Further complementing its off-road capabilities are a low range reduction gear ratio, lockable centre and rear differentials, an under body engine and transmission guard and a larger capacity 100 litre fuel tank.

Not that the V6 TDI 4XMOTION® lacks any sophistication on the open road. Its 8 speed automatic transmission is ideal for eating up the kilometres on long journeys and it also features our full array of driver assistance technologies (including ABS, ESP, Brake Assist and Anti Slip Regulation) and dedicated safety systems, both active and passive, including 9 airbags, extensive crumple zones and safety optimised front head restraints.

The V6 TDI V6 TDI 4XMOTION® is also equipped with 20inch Pikes Peak alloy wheels, Bi-Xenon headlights with LED daytime driving lights, fog lights and Rear View Camera (RVC Plus) as standard.

It's comfortable, too. The Nappa leather appointed interior, dual-zone air conditioning, RNS850 satellite navigation system and colour Multi Function Display (MFD) ensure that regardless of your destination, you'll be travelling with ease. The Touareg's front seats feature 14-way electric adjustment including electro-pneumatic side bolsters, while the back seats feature a 60/40 split to maximise load-carrying capacity. The interior is finished off with attractive chrome highlights and Vavona ornamental wood inserts.

From its stylish appearance to its sublime performance, we like to think of the V6 TDI 4XMOTION® as the most versatile Touareg ever.

V8 TDI R-Line

Drive all day

The new Touareg V8 TDI R line is styled and powered with performance in mind. It's also a truly versatile, everyday car that is perfectly suited to those who require serious performance, producing 250kW of power and 800Nm of torque to be precise. With full-time 4MOTION® all-wheel drive and Volkswagen's 8 speed automatic gearbox it can shift into overdrive while still enjoying the stability and safety provided by sending power to every corner of the vehicle.

That stability is enhanced by the latest generation of Volkswagen's safety systems. These include standard features like ABS and ESP and advanced technologies like Brake Assist, EDL (Electronic Differential Lock), ASR (Anti Slip Regulation), Front Assist and City Emergency Brake (City EB).

Working in conjunction with passive safety systems including 9 airbags, safety optimised front head restraints and extensive crumple zones, you can be confident that this is a car that is doing everything it can to keep you and your passengers safe. Volkswagen Proactive occupant safety protection system give the Touareg V8 TDI R-Line a comprehensive safety focus.

The V8 TDI R-Line doesn't just impress with its power output, it also comes loaded with a range of equipment as standard. Keyless Access, Adaptive Cruise Control, Area View, Side Assist, Dynaudio premium audio system, 4 zone automatic climate control and two tone Nappa leather

appointed front sport seats with embossed R badging deliver all the creature comforts you could wish for. From the outside the V8 TDI R-Line enforces its own presence, with R-Line exterior body styling, front and rear bumpers, side sills and rear roof spoiler along with R-Line exterior badging on front side panels. With the 21 inch Mallory alloy wheels and the V8 TDI R-Line is a well-dressed performer.

It's more than just a highway cruiser, however; it's also a capable vehicle around town, with the balance and precision to make short work of even the most trying conditions. The 4MOTION® system, standard air suspension system and overall dynamics mean that wherever your drive takes you, the V8 TDI R-Line will keep on motoring.

Exterior

Dynamic, purposeful, strong

The Touareg is a car that pleases the eye no matter what your vantage point. It sits well on the road, looking every bit the self-assured, sure-footed SUV. But it's also slippery, with improved aerodynamics and reduced frontal area. The extensive glass area improves visibility while lightening the design, while the chrome highlights and subtle hipline and bonnet guide the eye.

It's a powerful, dynamic-looking vehicle and there are plenty of design touches – headlights, roof rails and more – that hint at the versatility that lies below the surface.

01. Karakum 18x8" Alloy Wheel (standard on 150TDI)

02. Pikes Peak 20x9" Alloy Wheel (standard on V6 TDI & V6 TDI 4XMOTION®)

03. Mallory 21 x 9.5" Alloy Wheel (standard on the V8 TDI R-Line)

04. Automatically opening & closing Tailgate*

Standard on the V6 TDI, V6 TDI 4XMOTION® and V8 TDI R-Line the tailgate can be automatically closed and opened remotely via the button on the Touareg key, using the rear handle or by a button on the drivers door. Sensor strips prevent the door from closing on your fingers. The opening angle can also be programmed.

05. Front fog lights

To make sure you can see where you're going regardless of conditions, the Touareg comes equipped with fog lights mounted in its lower bumper. This provides the optimal angle for illuminating fog banks and damp roads, reducing hazards and improving visibility.

06. Chrome roof rails

When you're escaping the city, you'll need to take the right gear with you. The Touareg's chrome roof rails provide mounting points for roof bars to attach skis, bikes, luggage pods and more – just the thing to make sure that you've got all the gear you need, whether you're planning to camp out for a week or just visit your favourite bike track.

07. Black grained wheel arch extensions (not pictured)

When you're tackling your favourite track, you want your car to be protected. Wheel arch extensions in sturdy black grained plastic will help keep your paintwork safe from plenty of miscellaneous scratches and other marks, while complementing the Touareg's sturdy good looks.

08. Chrome rear bumper loading step^ (not pictured)

Sometimes you need to rest a heavy load on the rear bumper, so the entire Touareg range have a chrome loading step on the rear bumper to make loading up as easy as can be. Not only does it look great, it protects your bumper from accidental damage and provides a sturdy platform when fitting your load into the car.

09. Rear View Camera (RVC Plus) (not pictured)

Why take any chances? Volkswagen's Rear View Camera (RVC Plus) helps assure that you always have a good view of what's behind your car. It doesn't matter whether you're reversing out of a busy parking lot or trying to manoeuvre in tight confines, it's always helpful to have the extra vision afforded by this rear view camera.

Optional equipment. * Optional off road exterior style package shown. ^Not available on the V6 TDI 4XMOTION model with optional offroad package

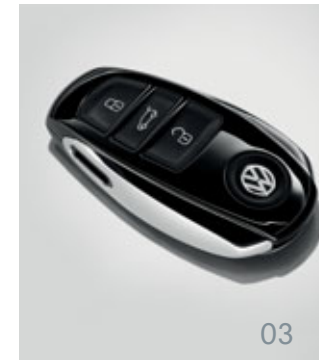

Interior

Safety, comfort and style

Nobody likes to rough it all the time, which is why the Touareg's interior fit-out is as civilised as the rest of the car is tough. From the unique steering wheel to the adjustable seats and the Multi Function Display, the Touareg will protect you from the elements, soothe your senses and keep you comfortable and alert on those long drives.

It's important to have controls that fall easily to hand, so our engineers have worked hard to ensure that the Touareg's amenities are as simple to use as possible.

01. Steering wheel

The Touareg's steering wheel is bound in leather, for the best possible comfort. It also carries controls for the radio, Bluetooth® phone connectivity and the multi function display. Ergonomically designed to ensure minimal distraction from the task of driving, the controls fall naturally to hand, meaning you can concentrate on the road ahead at all times.

02. MFD premium colour display

The Touareg's centrally located colour display is also a screen operated information system. Use it to control the phone, radio or navigation system, or just to display the vehicle information (outside temperature, fuel range and more) you want. It's easy to see, easy to use and most importantly, easy to configure to suit your driving needs.

03. Unique ignition and key

The Touareg's unique key features a high-quality ergonomic design that sits comfortably in your hand or your pocket. It has the customary three buttons (lock, unlock and rear tailgate release) as well as an emergency mechanical key. Simply slip the key into the ignition and the radio or navigation system is activated automatically; turn it in either direction and the engine will start.

04. Comfort seats

The Touareg's front seats feature 14-way electric adjustment including electro-pneumatic side bolsters in the 150 TDI, V6 TDI and V6 TDI 4XMOTION® models. Height, incline, lumbar support and more can all be individually adjusted to your perfect driving position.

05. Sports front seats

The Touareg V8 TDI R-Line come fitted with adjustable 14 way electrical sports front seats finished in stylish Flint Grey and Titanium Black Nappa appointed leather. To finish the sports styling you will find R-Line embossed badges on the front seats.

06. Keyless Access*

The V8 TDI R-Line comes standard with Keyless access. This intelligent system will detect your key in your pocket and offers keyless entry and starting system. The system also comes with a sporty starter button.

* Only available as standard on V8 TDI R-Line.

Technology

Driving towards tomorrow

At Volkswagen, we pride ourselves on the quality of our engineering. That means including all the technology that's needed – and none that isn't. The Touareg is one of our most advanced models yet, with a range of technologies that work to provide the best drive possible – without intruding on the driving experience itself.

From engines and transmissions to efficiency measures and driver assistance systems, you'll find the Touareg to be safe and sophisticated, delivering the drive you want and leaving you fully in control.

01

BLUEMOTION

— TECHNOLOGIES —

04

01. TDI engine technology

Volkswagen's cutting-edge TDI engines with Diesel Particulate Filters feature Common Rail technology that injects precise amounts of fuel at extremely high pressure. This not only results in a cleaner burning engine – and years of hard-wearing durability – but exceptional fuel economy, impressive torque and compelling performance whatever the drive.

02. 4MOTION® (all wheel drive) (not pictured)

The 4MOTION® all wheel drive system provides the ultimate in enhanced road safety and superior handling and features. This innovative Volkswagen technology provides the best possible traction at all road speeds and conditions, regardless of the weather.

03. 4XMOTION® (four wheel drive) (not pictured)

Volkswagen's electronically controlled permanent four-wheel drive system, 4XMOTION® distributes the engine torque between the front and rear axles and, when required, individually to each wheel. In normal situations the torque is split 38:62 between the front and rear axles, the Touareg can automatically direct 100% of the torque to a single wheel should the conditions prove that demanding. You can choose low range and lock the centre differential manually for absolute predictability.

04. BlueMotion Technology

Greater efficiency. Lower pollution. BlueMotion Technology is the name we've given to a whole range of innovations and intelligent technologies engineered specifically for our cars – to make them powerful, fun to drive, fuel efficient and environmentally-friendly, all at the same time. Look for the BlueMotion Technology brand mark, and take comfort that you're driving one of the cleanest, most energy-efficient vehicles in our range.

05. Start/Stop system* (not pictured)

A clever way to reduce emissions, and it's as simple as pressing the brake. When you come to a standstill by pressing the brake, the engine automatically turns itself off. Only to re-start again the moment you loosen the brake. Simple. But effective. ^

06. Air Suspension System (not pictured)

Air suspension with selectable "COMFORT", "NORMAL" and "SPORT" settings, self-levelling suspension, ride height adjustment and continuous speed-dependent electronic damping control results in a unique synergy of on and off-road qualities on the Touareg. Air suspension is standard on the V6 TDI, V6 TDI 4XMOTION® and the V8 TDI R-Line.

^ Deactivation will not occur in certain conditions. * Not available on V8 TDI R-Line

Technology

08. Lane Assist* - Not available on V8 TDI R-Line. □

Lane Assist is a driver assistance technology that reduces the likelihood of your vehicle veering off the road or accidentally crossing into another lane. Using a camera positioned within your rear view mirror unit, it actively recognises lane markings and warns the driver via steering wheel vibrations. Another innovation that helps give you drama-free driving.

09. Side Assist*^ □

Side Assist helps to prevent accidents during lane-change manoeuvres. The system monitors the area to the left and right of the vehicle and up to 50m behind it and warns the driver of a potentially hazardous lane change situation by means of flashing warning lights in the exterior mirrors.

10. Adaptive Cruise Control (ACC) and Front Assist, with City Emergency Brake (City EB)^ □

Adaptive Cruise Control (ACC) is an extension of conventional cruise control – with advanced capabilities based on a radar sensor that allows your Touareg to automatically brake and accelerate (within a set range) to keep to a pre-selected distance from other cars. If the Touareg approaches a slow moving vehicle, the ACC brakes the car to the same speed, and maintains the pre-selected distance. Even when a vehicle pulls into the same lane in front of you or slows, the Touareg automatically decelerates to the pre-selected distance. If the vehicle ahead moves out of your lane, the Touareg then accelerates up to the preset desired speed.

The Front Assist ambient traffic monitoring system uses a radar sensor to detect critical distance situations and thus help to shorten the braking distance, reducing the risk of a rear-end collision. The traffic ahead is monitored constantly by the radar at the front. If a vehicle is detected ahead

of you in the lane, the distance and the speed relative to it are calculated. If the gap is closing too fast, Front Assist initially warns the driver by means of an audible as well as a visual signal. At the same time, the brake pads are brought into contact with the brake discs and the sensitivity of the Brake Assist is increased. This primes the braking system for a possible emergency stop. If the situation escalates, the emergency brake function provides automatic braking and or boosting of the drivers braking force up to maximum braking. The City Emergency Brake function will aid in preventing low speed nose to tail collisions in traffic situations.

11. Area View □

Having the right information is important. Standard on the V8 TDI R-Line the Touareg's Area View system uses four unobtrusively located cameras (in the front bumper, door mirrors and tailgate handle) to produce a 360° view all around the car – including areas the driver can't see. The cameras are also used to calculate a Birdseye view, which is shown on the audio system's display.

The view can be controlled via the touchscreen display, and may show the all around view or the individual camera views (each side is reproduced as a full 180° image). Static and dynamic guidance lines provide further assistance with positioning the car exactly where and how you want it, whether you're reversing into a tight space or trying to get a good view around a corner (the system provides a 90° view from the car's front-most point).

12. Automatic Gearbox (not pictured)

Volkswagen's standard 8-speed automatic transmission is the perfect choice for day-to-day driving. Its carefully-spaced gear ratios deliver optimum power without aggressive kickdown, over-revving or labouring the engine. This ensures smooth driving, good traction and improved safety.

□ Optional on 150TDI, V6 TDI and V6 TDI 4XMOTION. * Only as part of the Driver Assistance Package. ^ Standard on the V8 TDI R-Line.

Safety

Safety comes as standard, every time

There's nothing more important than the safety of you and your passengers. And you'll find when you drive a Touareg, safety has been considered from almost every angle. A broad range of passive and active safety systems help to avoid accidents as well as protecting you during one have been included helping to ensure every drive you take, is a safe one.

Active Safety – Everything designed to help prevent accidents from happening.

01. Traction Control (EDL, ASR and ESP) and Braking Control (Brake Assist, ABS and EBD)

Traction control helps to ensure that you maintain control of your vehicle even in difficult driving situations. Built around three distinctive functions, Electronic Stabilisation Program (ESP), Electronic Differential Lock (EDL) and Anti-Slip Regulation (ASR), Traction Control improves grip, helps prevent wheel spin and adjusts engine power automatically depending on the conditions.

Passive Safety – Protecting occupants from injury, and reducing the impact of collisions.

02. Airbags

The Touareg comes standard with nine airbags; twin front, side, rear seat side, driver's knee and full length curtain airbags. Combined with your seatbelts, airbags help to reduce the risk of severe head and chest injuries during collisions.

03. Safety optimised head restraints (not pictured)

By working in unison with your vehicle's seatbelts, your Touareg's front Safety Optimised Head Restraints are designed to reduce whiplash injury – ensuring optimal protection when you need it most.

04. Crumple zones

The body of the Touareg has also been designed with the passengers' safety in mind. Front and rear crumple zones absorb the energy of an impact in the event of an accident, working together with the safety cell for you and your passengers inside the cabin.

05. Proactive occupant protection system (not pictured) ☐

The Touareg's innovative new proactive occupant protection system optional on 150TDI, V6 TDI and V6 TDI 4XMOTION, combines both active and passive safety systems to ensure that you're kept as safe as possible. Sensors on the vehicle's dynamic control systems (like Brake Assist and ESP) detect situations with elevated accident potential and help defuse them. It is activated in three situations: emergency brake activations (sudden, strong braking), hazard brake activations (sudden rises in brake pedal pressure when already braking) and unstable driving states (understeer or oversteer).

When such a situation is detected, the front seat belts are tightened. This stabilises the driver, helping maintain control of the car, and also positions occupants in their seats so as to maximise the protective effects of the airbag and seat belt systems. If high transverse motion is detected, the side windows and sunroof are closed (leaving a small air gap) to better support the head and side airbags, should they be deployed.

☐ Optional on 150TDI, V6 TDI and V6 TDI 4XMOTION as part of the Driver Assistance Package.

Entertainment

01

01. RNS850

The Touareg's Radio Navigation System (optional on 150TDI) provides state-of-the-art multimedia technology to make navigation easier than ever. Easy to operate, with a large, multicolour, 16:9 aspect ratio touchscreen, the RNS also includes a 60GB hard drive for storing navigation and music files.

Supporting a wide range of formats including MP3 and MP4; AAC (iPod format); AVI; WMA and WMV; the system also includes a DVD player for movie (and music CD) playback. Two SD card readers (SDHC compatible for cards up to 32GB) make the system versatile and highly capable. Controls include the touch screen and a number of 'hard' buttons below the display, and of course the radio can be controlled from the Touareg's steering wheel.

The RNS850 also features an off-road display with compass and height displays, and a steering wheel turning angle that's especially useful when driving on loose surfaces.

02. Dynaudio Premium Audio System*

Dynaudio Confidence 620W premium audio system comes with a digital 12-channel digital amplifier and 12 low resonance speakers for a gorgeously rich depth of detailed sound. This remarkable system comes standard on the V8 TDI R-Line.

03. Bluetooth® phone connectivity

Compatible with phones featuring a Bluetooth® hands-free profile, operation is possible via the touch screen and multi function display (MFD). Through its crystal clear sound system, you can stream music wirelessly from your phone, display your contacts list and take advantage of convenient steering wheel mounted controls.

04. Media Device Interface (MDI)

Conveniently located in the Touareg's glovebox, the Media Device Interface includes a USB cable to connect your media player to the audio system. An iPod cable is available as an accessory. This means you can bring your favourite media with you when you travel, without having to worry about carrying stacks of CDs or DVDs you can control the MDI via the touch screen.

* Image for illustration purposes only & iPod® not included.

* Optional equipment on the V6 TDI and V6 TDI 4XMOTION.

Optional Packages

Make it uniquely yours

Every Touareg comes with a wide array of features to ensure your driving experience is complete. But your personality, lifestyle and requirements are your own, and it's important that your vehicle delivers exactly what you want.

Which is why we offer a comprehensive range of optional packages. These give you the freedom to create a car that meets all of your needs, whether for additional

comfort, individual styling, or peace of mind on longer drives. Your Touareg should be perfectly in tune with your lifestyle – and with these options, it will be.

So for those who want a little more, step out of the square and into the Touareg.

01

01, 02 & 03. Sports Interior Package*

The Touareg is a capable touring car, equally at home on highway cruises and scenic switchbacks. For those who prefer a more spirited driving style, the Touareg can be fitted out with a number of options to improve the experience. The sports interior package includes extras like a heated multi-function steering wheel with gearshift paddles; brushed aluminium dashboard, console and door trim inserts; aluminium finish accelerator and brake pedals; dark tinted rear side and rear window glass; and door sill scuff plates with aluminium inserts.

04. Comfort Package*

On long drives, comfort plays an important role in keeping drivers alert and aware. And everyone's opinion of comfort is different. The Touareg accommodates that. The optional Comfort Package includes a four-zone climate control air conditioning system, so each occupant can adjust the ambient temperature to their liking. Both front seats include a memory function (so once adjusted, the settings can be saved and accessed whenever necessary). The package also includes a 100 litre fuel tank and electronic adjustment (with memory function) for the steering wheel so that once the most comfortable settings are found, they can be stored and retrieved. This Package comes standard on the V8 TDI R-Line.

05. Driver Assistance Package

The technologies in this package are designed to provide an additional measure of comfort and safety, especially on longer drives. They include a heated steering wheel to improve comfort; Side Assist; Lane Assist; Proactive occupant protection system; Adaptive Cruise Control (ACC) and Front Assist, with City Emergency Brake (City EB) function; uses radar sensors to monitor your speed and spacing from other vehicles, helping to keep you relaxed and alert. This Package comes standard on the V8 TDI R-Line. (Lane assist not available on V8 TDI R-Line)

06. Off-road styling package (not pictured)

Available on the V6 TDI 4XMOTION® this package includes dual oval chrome exposed exhaust tail pipes, grey and silver coloured lower body side and bumper trim, black trim around side window frames and loading sill protection. This package is designed to equip your Touareg for more rugged terrain.

* Optional on the V6 TDI and the V6 TDI 4XMOTION®.

Volkswagen Genuine Accessories

The finishing touches

Our comprehensive range of genuine accessories give you the freedom to customise the look and feel of your vehicle to reflect your own personality and individual sense of style. The product philosophy is simple – to deliver innovative technologies and premium design – right down to the finest detail. Each and every genuine accessory has been designed specifically with the Touareg in mind and has been

engineered and rigorously tested to ensure that it meets the same high standards of quality as the vehicle itself.

For more information or to experience the full range of genuine accessories designed to suit the Touareg, visit your local Volkswagen Dealer.

- 01. Roof Box
- 02. Roof Cross Bars & Ski & Snowboard Holder

[^] Emission level according to European Regulation (EC) No. 715/2007 and Regulation (EC) No. 692/2008. * The Start/Stop system is designed to reduce fuel consumption and CO₂ emissions. It achieves this by automatically switching off the engine while the vehicle is stationary and then starting it again automatically when the driver wants to drive off. There are certain operating conditions where the Start/Stop system is deactivated (e.g. during engine warm-up), please refer to the owner's manual for full operating information. # Please note figures are sourced from overseas data where equipment levels by model variant may vary.

^{**} Fuel consumption figures according to Australian Design Rule (ADR) 81/02. The driving style, road and traffic conditions, environmental influences, fitment of accessories and vehicle condition can in practice lead to consumption figures which may differ from those calculated with these standards. Fuel tank capacity figures in brackets relate to vehicles equipped with the optional Comfort Package.

Fuel Saving Tips

We can all Think Blue.

At Volkswagen, we aim to produce the most fuel efficient, environmentally sustainable vehicles possible. The good news is – we can all do our little bit to 'Think Blue'. Below, we have summarised the best tips for how you can drive more responsibly and reduce fuel consumption even further. It's not just your wallet that will benefit from these tips, but the environment too. Its practical benefits go far beyond just saving money and reducing emissions. Here are nine tips on how to drive more efficiently.

Be aware and save fuel. Think Blue.

01. Take it easy and save Drive the modern way and think ahead.

Drive smoothly and anticipate hazards. Hard braking and acceleration, sudden lane changes and unpredictable behaviour is fuel-inefficient.

02. Change up early and fill up later Drive in the highest gear possible.

Use a higher gear with a manual transmission. Low revs take far less energy. With an automatic, reduce acceleration and avoid a kick down.

03. Just let it roll Use overrun fuel cutoff.

With the right driving techniques, you can really save. Whilst in gear, coast down hills or towards traffic lights to reduce feeding fuel to your engine.

04. Comfort high, fuel consumption low Use auxiliary equipment in moderation.

Check the equipment you're using – if you don't need it, consider turning it off. De-misters, sound systems and air conditioning all use energy.

05. Savings are in the air Check your tyre pressures.

Check your tyre pressures to cut fuel consumption. Under-inflated tyres force your car to burn more fuel. Tyres in good order will help you save fuel.

06. A warm engine – a cool way to save Avoid short trips.

Plan to minimise the number of trips you need to make. Frequent short trips mean higher fuel consumption as cold engines run less efficiently.

07. Well-oiled for impressive savings Use Volkswagen approved engine oils.

A well-lubricated engine produces less emissions especially when the weather is cold or the trip is short. Change your oil at regular intervals.

08. Keep it sleek Cut aerodynamic drag.

Remember to remove roof racks, bike racks or roof boxes off your car when they're not in use. Keep windows up and sunroofs closed to reduce drag.

09. Lightly does it Avoid unnecessary weight.

Every kilogram you load into your car takes energy to move – energy that will be supplied by burning fuel. The lighter you drive, the more you save.

Touareg Capped Price Servicing*

The Touareg comes with peace of mind included, with Capped Price Servicing* now available at participating Volkswagen dealers.

Authorised Volkswagen Service Centres have factory trained technicians equipped with the very latest diagnostic equipment, specialist tooling and Volkswagen Genuine Parts. They also undertake work in accordance to factory specified guidelines and maintenance schedules, so you can be confident that your Touareg will be well taken care of.

*Capped price servicing is available at participating Volkswagen dealers on Touareg automatic models first sold by an authorised Volkswagen dealer on or after 1 January 2013. Capped price servicing applies to the first 6 standard scheduled services of your vehicle which are scheduled to occur at every 15,000km/12 month interval (whichever occurs first). Exclusions and conditions apply. For details on pricing, items not included in the capped price and for full terms and conditions please see volkswagen.com.au. Volkswagen Group Australia reserves the right to at any time modify or discontinue the Capped Price Servicing program.

Glossary

4MOTION®

The power of the Touareg engine is transmitted to the wheels via the permanent 4MOTION® all-wheel drive system. This flow of power is handled by a Torsen transfer box to direct drive to the wheels where required to provide the best possible traction at all road speeds, in all weather and road conditions.

4XMOTION^

The power of the Touareg engine is transmitted to the wheels via the continuous 4XMOTION four-wheel drive system. This flow of power is handled by a transfer gearbox, which includes off-road reduction. The 4XMOTION system also includes a locking central and rear differential.

In normal situations - dry road, even grip, constant engine power – the drive torque is distributed uniformly to the front and rear axles without slip. The four-wheel drive system is distinguished by a 38:62 distribution of power to the front and rear axles through a centre differential. A four-wheel EDL (Electronic Differential Lock via braking) also supports this adjusted power distribution. To improve tractability further both centre and rear differentials can be locked via the centre console dials.

Adaptive Cruise Control (ACC)^ □

Adaptive Cruise Control (ACC) is an extension of the conventional cruise control system with advanced capabilities based on radar sensors, multi-function camera and parking distance sensors. When ACC is activated, the vehicle automatically brakes and accelerates in a speed range set by the driver.

If the Touareg approaches a slower vehicle, the ACC brakes the car to the same speed and maintains the pre-selected distance. Even when a vehicle pulls into the same lane in front of you or slows, your vehicle is automatically decelerated to the pre-selected distance. If the vehicle ahead moves out of your lane, the Touareg then accelerates up to the preset desired speed.

Deceleration of the vehicle may take place via intervention in the engine management system. If deceleration via engine torque is not sufficient, brake intervention takes place, braking the vehicle to a standstill if the traffic situation necessitates. ACC will reactivate automatically if the traffic moves within 2 seconds, otherwise the driver can reactivate the system by tapping the accelerator pedal.

Adaptive Cruise Control (ACC) cannot replace the driver's assertiveness. The driver is still legally responsible for the vehicle and must monitor the speed and distance in relation to other vehicles. The ACC system does not react to stationary obstacles and oncoming vehicles. The ACC system should not be used on winding roads or in adverse weather conditions such as heavy rain.

Anti-lock Braking System (ABS)

When braking, wheel speed sensors measure the road wheel speed and should one or more wheels start to lock the ABS system reduces brake pressure to that wheel. This prevents the wheels from locking during heavy or emergency braking, enabling the vehicle to remain steerable.

Anti-lock Braking System (ABSplus)

In addition to the functionality of ABS, when the off road function is selected via the centre console dial the ABSplus is activated. If loose surfaces are registered, wheel lock forms a wedge in front of the wheels significantly shortening braking distances in off-road conditions.

Auto Hold function

When activated, as soon as the vehicle comes to a complete stop, the ABS hydraulic unit stores the vehicles final braking pressure. So even when you take your foot off the brake pedal, all four wheels brakes remain applied, preventing the vehicle from rolling away without having to depress the footbrake providing increased comfort in stationary traffic. This function is released automatically when you drive off again.

Electronic Brake-pressure Distribution (EBD)

Electronic, more sophisticated means of regulating the ratio of front/rear brake pressure. Settings are varied according to driving and load conditions to ensure each wheel is braked to the optimum extent.

Brake Assist

During emergency braking, Brake assist aids the driver by increasing the brake pressure automatically to a level exceeding the locking limit. The ABS is thus quickly brought into the operating range, which enables maximum vehicle deceleration to be achieved.

^Only available on selected models. □ Optional equipment on 150TDI, V6 TDI & V6 TDI 4XMOTION

Glossary

Electronic Differential Lock (EDL)

EDL improves driving and steering characteristics when accelerating on road surfaces where each wheel has a different degree of traction. The system operates automatically and is combined with the ABS system. Using the ABS wheel sensors, EDL monitors the speed of the individual driving wheels. When a difference in driving wheel speed is detected (i.e. when one wheel starts to spin due to differences in road surfaces, e.g. due to water or dirt) the system brakes the spinning wheel, transferring engine power to the wheel with the best traction. EDL is active on both axles in forward and reverse and operates up to 40km/h.

Anti-Slip Regulation (ASR)

ASR is a switchable traction control system that prevents the wheels from spinning under acceleration by reducing engine torque. It is active at speeds above 40km/h.

Electronic Stabilisation Program (ESP)

ABS, EDL and ASR traction control systems are integrated into the Electronic Stabilisation Program (ESP). In short, ESP helps ensure that the vehicle goes where you steer it even in extreme driving conditions. The ESP system constantly compares the actual movement of the vehicle with pre-determined values and should a situation arise where the vehicle starts to skid, ESP will apply the brakes to individual wheels and automatically adjust the engine's power output to correct the problem. ESP prevents the vehicle from losing control when trying to avoid an accident, for example. It also prevents spinning off on a curve due to either understeer or oversteer.

Engine Braking Control (EBC)

Prevents the driven wheels from locking if the accelerator is lifted very suddenly or the vehicle is braked sharply because a low gear is engaged.

Fatigue Detection

The driver Fatigue Detection system automatically analyses the driving characteristics and if they indicate possible fatigue, recommends that the driver takes a break. The system continually evaluates steering wheel movements along with other signals in the vehicle on motorways and others roads at speeds in excess of 65 km/h, and calculates a fatigue estimate.

If fatigue is detected, the driver is warned by information in the Multi-function Display (MFD Premium) and an acoustic signal. The warning is repeated after 15 minutes if the driver has not taken a break.

Fatigue Detection cannot replace the driver's assertiveness. The driver is still legally responsible for the vehicle and therefore determining whether or not they are fit to drive. A driving time of 15 minutes is required in order to assess the driver correctly. The functionality of the system is restricted given a sporty driving style, winding roads and poor road surfaces.

Front Assist with City Emergency Brake (City EB) function

The Front Assist ambient traffic monitoring system uses radar sensors to detect critical distance situations and thus help to shorten the braking distance, reducing the risk of a rear-end collision.

The traffic ahead is monitored constantly by the radars at the front. If a vehicle is detected ahead of you in the lane, the distance and the speed relative to it are calculated. If the gap is closing too fast, Front Assist initially warns the driver by means of an audible as well as a visual signal. At the same time, the brake pads are brought into contact with the brake discs and the sensitivity of the Brake Assist is increased. This primes the braking system for a possible emergency stop.

If the situation escalates, the emergency brake function provides automatic braking and or boosting of the drivers braking force up to maximum braking.

Front Assist cannot replace the driver's assertiveness. The driver is still legally responsible for the vehicle and must monitor the speed and distance in relation to other vehicles.

Hill Descent Assist

Hill Descent Assist supports the driver when driving down a steep incline at the speed elected by the driver by means of actively controlled brake applications. Hill Descent Assistance will only operate when off road mode is activated, speeds are lower than 30km/h, the gradient is greater than 10%, the engine is running and the accelerator and brake pedals are not pressed.

Glossary

Hill Hold Assist

The Hill Hold Assist function comes into effect when stationary on steep inclines, utilising the transmission as necessary to prevent the vehicle rolling back.

Lane Assist[^]

Lane Assist is a lane departure warning system that is designed to help reduce the likelihood of the vehicle leaving the road or crossing into an oncoming lane and therefore the risk of accident as a result of driver distraction or a lapse in concentration.

The Lane Assist system monitors the road ahead with the aid of a multi-function camera (located near the interior rear-view mirror) which recognises lane markings and evaluates the position of the vehicle. If the vehicle starts to leave the lane, the driver is warned about the situation by a steering wheel vibration.

Lane Assist cannot replace the driver's assertiveness. The driver is still legally responsible for the vehicle and therefore staying in the lane at all times. The system will not work if there are no recognisable lane markings. The camera vision can be reduced by rain, snow, heavy spray or oncoming lights. This and vehicles in front of you can lead to the lane markings not being recognised by the Lane Assist system. The Lane Assist system does not activate at a vehicle speed of less than 65km/h.

Proactive occupant protection system

The proactive occupant protection system incorporates active and passive safety elements. When the system detects a potential accident situation, the occupants and the vehicle are prepared for a possible accident. Automatic tensioning of the safety belts secures the driver and front passenger in their seats to attain the best possible protective potential of the airbag and belt system. In case of high transverse dynamics the side windows and optional panoramic sunroof are also closed, leaving just a small air gap. Closing of the windows offers optimal support to the head and side airbags which results in the best possible protection.

Side Assist

Side Assist, is a lane change assistant that detects vehicles on the right and left hand side of the lane, in the blind spot and those vehicles coming nearer behind. The system informs with a warning light in the exterior mirror whenever a detected vehicle is close and a lane change would be dangerous. If the driver sets the indicator, the warning light begins to flash.

Think Blue. Creating a sustainable future together

Volkswagen is committed to sustainability now and in the future, for us this means taking responsibility for the environment by getting involved in initiatives that contribute to a sustainable future through our products and behaviour. We call this way of thinking, Think Blue. Volkswagen aims to become the leading automotive manufacturer for the environment and economy, making efficient and sustainable vehicles available to everyone. We want to inspire and motivate people to get involved in ecological sustainability, on the road and everywhere else.

[^]Only available on selected models.  Optional equipment on 150TDI, V6 TDI & V6 TDI 4XMOTION

Owning a Volkswagen

Volkswagen New Vehicle Warranty

Every new Volkswagen passenger vehicle is covered by a 3-year unlimited kilometres manufacturer's warranty, which includes Volkswagen Assist (24hr roadside assistance). Every new Volkswagen passenger vehicle is also covered by a 3-year paintwork and 12-year anti-corrosion perforation warranty.

Volkswagen Assist – 24 Hour Roadside Assistance

As a valued customer, you can be assured that wherever you travel within Australia, you will have access to roadside assistance, 24 hours a day, 365 days a year. This is complimentary for the duration of the vehicle's original Volkswagen warranty period. You will receive help in the event of a breakdown or accident and if required, your vehicle will be mobilised or transported to an Authorised Volkswagen dealer.

As a Volkswagen owner you will also have access to the additional benefits of accommodation and car rental if your vehicle cannot be mobilised within 24 hours, when you are over 100kms away from home. Volkswagen Roadside Assist can also be renewed at the expiry of the original warranty, ensuring ongoing coverage for your vehicle.

Volkswagen New Vehicle Extended Warranty Insurance*

To give you added peace of mind and the assurance of added security, you have the option to extend the warranty period to suit your ownership cycle. If your Volkswagen is still covered by its New Vehicle Warranty, we can offer you a 12 months or 24 months/ unlimited kilometres extension on the original warranty period already existing with your Volkswagen manufacturers Warranty. You then have the assurance that your Volkswagen remains a Volkswagen. For further information regarding warranty and extending your vehicles warranty period, please consult your local Volkswagen dealer, refer to your owner's handbook or visit volkswagen.com.au.
